

## EASY DOES IT

© 2015 Bob Sima Music, *It's Time*, Released 5 February 2016

When it's up before the sun and you're running all day and night  
You're spinning plates and you're juggling dates and time needs to rewind  
You can just breathe, breathe and take it slow

When your feet are in the fire, there's too many moving parts  
The sky is falling, tomorrow's calling, and the past is breaking your heart  
You can just breathe, breathe and let it go

I said now easy, easy is my philosophical view  
I said now easy, easy does it is about the only way I do

When you're pushing on the door and the door is pushing back  
It's overrated, complicated, and something just don't feel right  
You can just breathe, breathe and let it go

When the whirlwind of possibilities blowing you around like tumbleweed  
And the square-peg round-hole situation just isn't what you need  
You can just breathe, breathe and let it be so

I said now easy, easy is my philosophical view  
I said now easy, easy does it is about the only way I do, I do

When you flow like water and you float like the breeze  
You make some space, you'll taste some peace  
The blurry lines will all become so clean  
Step by step and one by one, you simplify and have some fun  
And easy does it will become the only way to get things done

I said now easy, easy is my philosophical view  
I said now easy, easy does it is about the only way I do, I do

When you lose yourself in the madness in the fray of this crazy place  
You get palpitations, perspiration, there's medicine not far away
